## General information

Project period: December 1st, 2017 to May 31st, 2020

The project is funded by:

- European Social Fund (ESF)
- Häme Centre for Economic Development, Transport and the Environment (ELY Centre)
- Executing institutions

Budget: 1 000 001 €

Executors:

- City of Turku Education Division
- Omnia Joint Authority of Education in the Espoo Region
- Tampere Vocational College Tredu
- Oulu Region Joint Authority for Education (OSEKK)

## About the project

The project will develop a model for a 365/12 vocational college that never sleeps – an institution where studying and learning can happen anywhere at any time, regardless of time and place.

The new model will enable a faster pace of studying and earlier transition to working life as well as enhance cooperation with business life.

To reach its goal, the project will develop physical and virtual learning environments where learning progresses smoothly according to personalized plans.

## About the project

The development work for the 365/12 model is spearheaded by:

- Collaboration between businesses and education providers as a source for new innovations and business ideas
- Entrepreneurship as an integral part of studies
- Multivocational study paths created according to the needs of working life
- Virtual and digital studies as a part of the learning process
- Centres of Expertise as supporters of guidance and teaching methods
- Improving guidance for on-the-job learning periods using digital tools

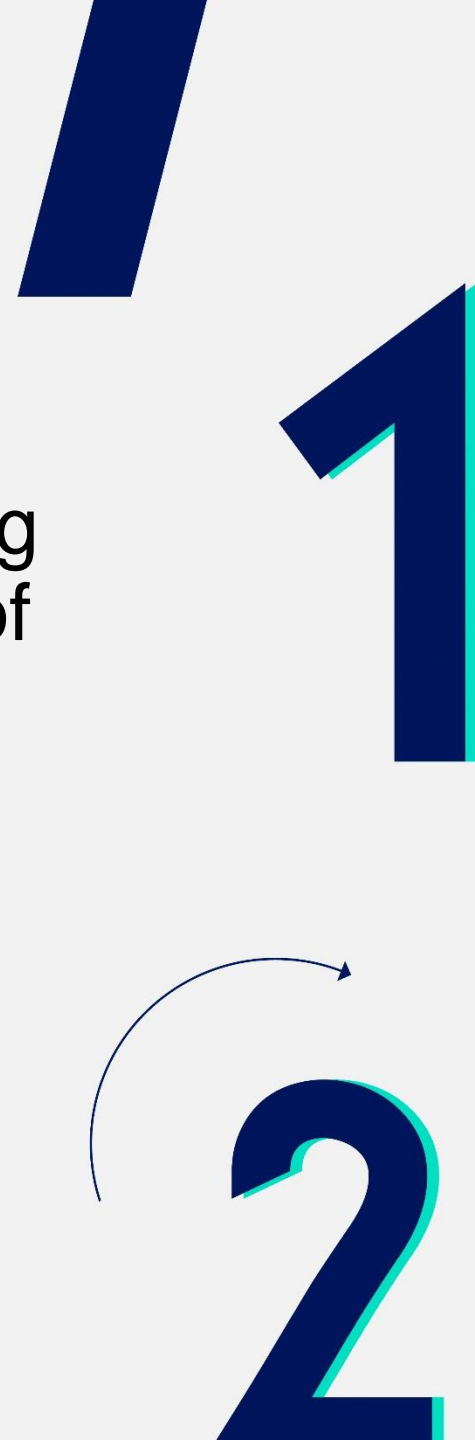

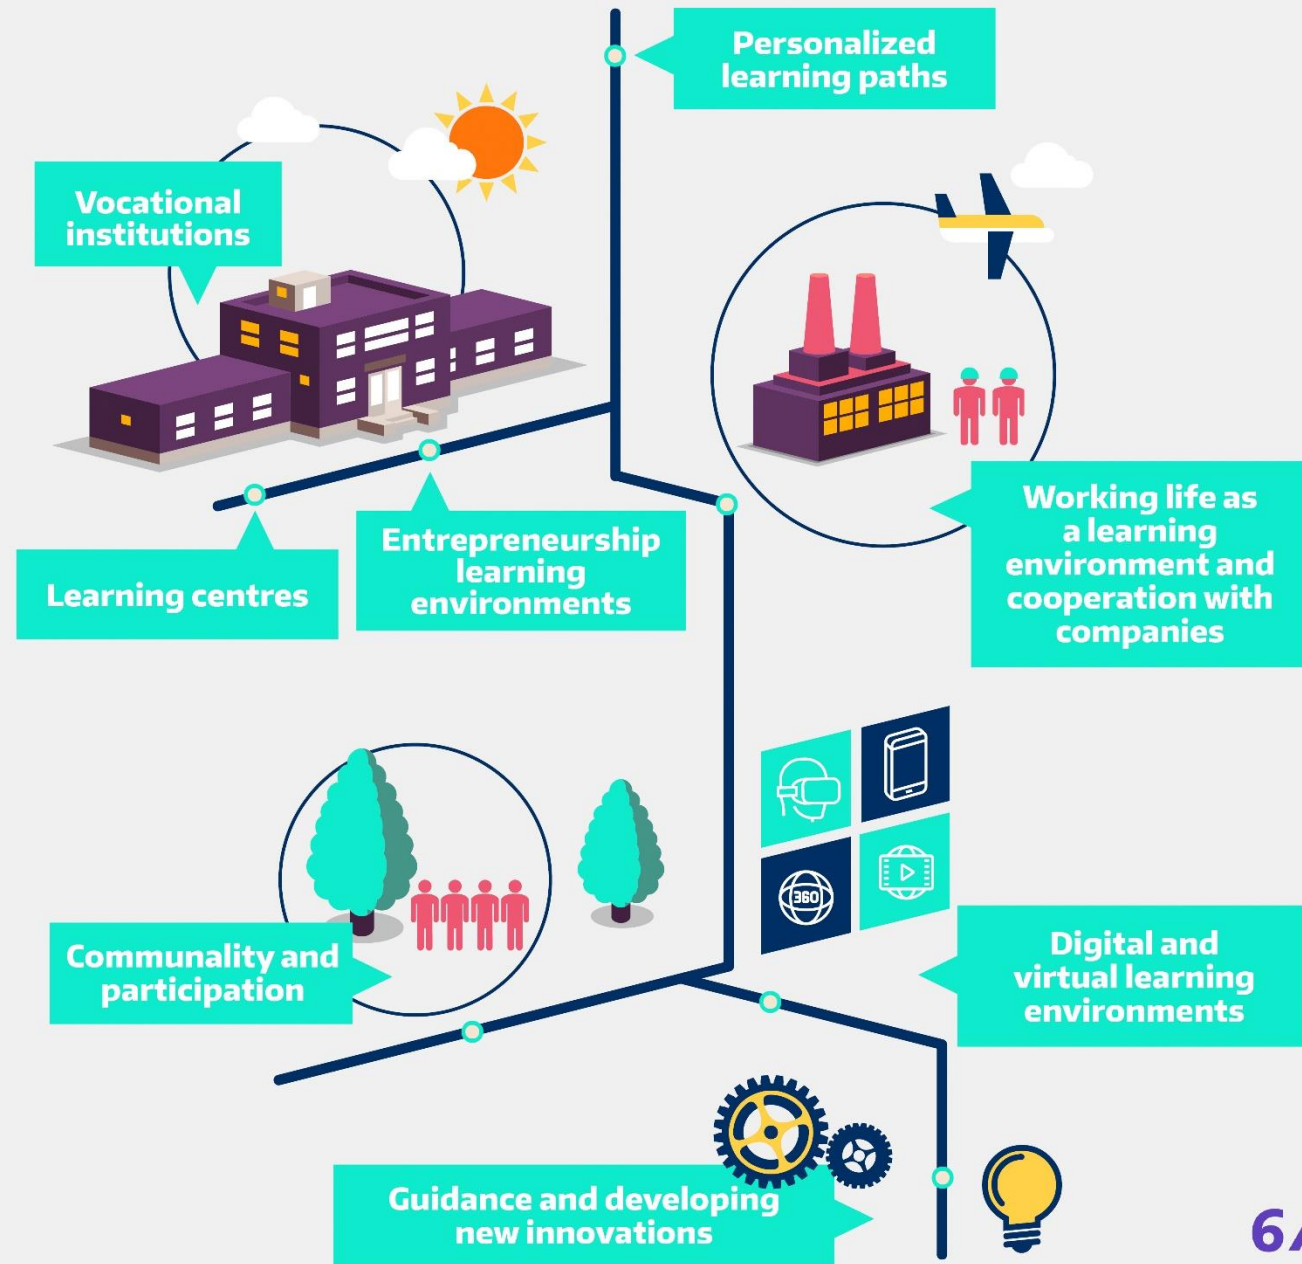

What do you think?

What enables vocational studying and learning to happen anywhere at any time, regardless of time and place?

## Wisio – the entrepreneurship learning environment

The entrepreneurship learning environment Wisio of Turku Vocational Institute inspires students towards entrepreneurship. Wisio gathers all entrepreneurship operations of Turku Vocational Institute under the same roof. Wisio has versatile entrepreneurship coaching facilities along with Café Wisio, a sewing shop, a beauty salon, childcare and activities for the elderly.

## The boat school Bore – learning environment on the waves of Aurajoki

Turku Vocational Institute started teaching at S/S Bore in the beginning of 2018. The hostel, breakfast and conference services at the ship are covered by the institute. The services are available daily around the year.

# Oppimo – a learning environment of enthusiasm and inspiration

Oppimo is a new learning centre inside Turku Vocational Institute. Oppimo offers low threshold guidance services for students, opportunities for self-study and support for studies.

## The health technology simulation environment

The health technology simulation environment is the home of an imaginary elderly person. It provides an opportunity for the students and teachers of Turku Vocational Institute to deepen their knowledge on technology-assisted customer work and learn the usage of different health technology equipment.
